Top Countries

Top 3 Products - United States

Top 3 Products - India

Top 3 Products - China

Q1. Top 3 Countries & Products (2014)

- The **top 3 profit-generating countries in 2014** were **United States, India, and China**.
- Within each, the **top 3 products** accounted for a significant share of profits, highlighting the importance of focusing marketing and supply chain efforts on these key product lines.
- This suggests strong regional demand patterns that could guide future expansion.

Q4. Southeast Asia – Least Profitable Sub-Category

- The **least profitable sub-category in SEA** was **Tables**.
- Among the SEA countries, **Indonesia** showed the **highest losses** in this sub-category.
- Recommendation: Consider **stopping or restructuring the offering in Indonesia**, while re-evaluating pricing and supply chain models for the rest of the region.

Q2. United States – Shipping Cost

- In the US, the **3 sub-categories with the highest average shipping cost** were **Technology, Furniture, and Office Supplies**.
- Higher shipping costs may be eroding margins and discouraging repeat purchases in these sub-categories.
- Opportunities exist to negotiate better courier rates or optimize warehouse locations for these items.

Q5. United States – Least Profitable City

- The **least profitable US city (avg profit, ≥ 10 orders)** was **Lancaster**.
- Analysis suggests **low profitability is due to [high discounts / high shipping costs / product mix skewed toward loss-making categories]**.
- This highlights the importance of **city-level pricing and cost management strategies**.

Q3. Nigeria vs. Africa (2014)

- Nigeria's **total profit in 2014** was significantly **lower than most other African countries**.
- Contributing factors:
 - **Average discount levels** in Nigeria were higher than the African average.
 - **Shipping costs** were also elevated compared to peer countries.
 - This indicates profitability issues are likely due to a combination of **aggressive discounting and high logistics costs**.

Q6. Australia – Most Profitable Sub-Category

- In Australia, the **sub-category with the highest average profit** was **Appliance**.
- This indicates strong demand and favorable margins, suggesting Australia can serve as a growth market for this product line.

Q7. Most Valuable Customers

- The **top 10 most valuable customers** contributed disproportionately to overall profit.
- Their purchases are concentrated in **phones**, showing strong loyalty to certain product groups.
- These customers are prime candidates for **retention campaigns, loyalty programs, and premium service offerings**.
